

SUMMARY

Computer Science and Engineering student with foundational knowledge in Python, C, Java, SQL, and web development. Interested in software engineering and AI applications, with hands-on experience through academic projects and hackathons. Strong problem-solving, teamwork, and adaptability skills.

EDUCATION

Zion Matriculation Higher Secondary School

Bio-Mathematics
Percentage: 75%

Prince Dr K Vasudevan College of Engineering and Technology

B.E. Computer Science and Engineering
CGPA: 8.5
Expected Graduation: 2027

SKILLS

- Currently learning and practicing Python (basic programming concepts)
- Basic understanding of C and Java programming
- Fundamentals of SQL and database queries
- Quick learner with the ability to grasp new concepts efficiently
- Strong interest in staying updated with emerging technologies
- Good problem-solving and analytical thinking ability
- Effective communication and teamwork skills

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals
Udemy

EXPERIENCE

SMART INDIA HACKATHON 2025 - Team Ctrl Alt Elite

Role: Team Member (Software Developer)

Project: AgriGuide – Localized Decision Support for Farmers

- Developed an AI-based solution to support farmers with crop and resource recommendations.
- Worked with Python for data processing and basic AI model integration.
- Contributed to chatbot interface design and API integration in a team environment.
- Participated in project design, testing, and overall system improvement.

ROSTER EASE – Restaurant Staff Management System (Ongoing)

Role: Developer

- Developing a web-based staff scheduling system to manage restaurant employee shifts efficiently.
- Designing modules for shift allocation, staff availability tracking, and leave management.
- Working on weekly roster generation to reduce manual scheduling effort and conflicts.
- Implementing database integration for employee details, schedules, and shift records
